Ch.1 Flashcards | Quizlet

The brain is an organ that serves as the center of the nervous system in all vertebrate and most invertebrate animals. The brain is located in the head, usually close to the sensory organs for senses such as vision. The brain is the most complex organ in a vertebrate's body. In a human, the cerebral cortex contains approximately 14–16 billion neurons, and the estimated number of neurons in ...

Brain - Wikipedia

The previous chapter describes seven principles that support learning with understanding. This

chapter explores the implications of those principles for the intentional and systemic design of four key elements of the educational system—curriculum, instruction, assessment, and professional development—to promote learning with understanding within the context of advanced study.

7. Designing Curriculum, Instruction, Assessment, and ...
