Life History. Northern shrimp (*Pandalus borealis*) is a crustacean located in the cold waters of the Northern Hemisphere. On the U.S. Atlantic coast, the Gulf of Maine is considered the southernmost extent of the species range. Northern shrimp are hermaphroditic, maturing first as males at roughly 2 1/2 years of age and then transforming to females at about 3 1/2 years.

1997: Mr. Money Mustache, Mr. Frugal Toque, and two other friends move into a house together, all of us newly graduated tech workers ready to begin our careers. Between the parties and late nights of work, we notice that one. of those other roommates appears to be running an underground laundromat: when he is home, the washer and dryer are always running simultaneously, and he is running up ...

[Edit 3/2014: I no longer endorse all the statements in this document. I think many of the conclusions are still correct, but especially section 1 is weaker than it should be, and many reactionaries complain I am pigeonholing all of them as agreeing with Michael Anissimov, which they do not; this complaint seems reasonable.
