Lipids are the main component of cellular membranes. They are highly diverse in structure, and the distribution of different lipids and their species (membrane lipid composition) varies at the ...

Understanding the diversity of membrane lipid composition ...

ADVERTISEMENTS: Transposons: Definition and Types! Definition of Transposons: Presence of transposable elements was first predicted by Barbara McClintock in maize (corn) in late 1940s. After several careful studies, she found that certain genetic elements were moving from one site to an entirely different site in the chromosome. She called this phenomenon of changing sites of [...]

Transposons: Definition and Types (With Diagram)

PLANT ENERGY TRANSFORMATIONS 2 . Photosynthesis: When life originated on this planet some 3.8 billion years ago, the first life forms were single celled heterotrophs.

The glossary that follows assumes a definition of ecology--the study of interactions between organisms and their environment--much wider than what fits under the field's habitual statistical persona. Ecofeminism and ecopsychology are mentioned, for example, as are terms from organic gardening and permaculture.

Abiogenesis, or informally the origin of life, is the natural process by which life has arisen from non-

living matter, such as simple organic compounds. While the details of this process are still unknown, the prevailing scientific hypothesis is that the transition from non-living to living entities was not a single event, but a gradual process of increasing complexity that involved molecular ...

Abiogenesis - Wikipedia

Ecology; Ecology addresses the full scale of life, from tiny bacteria to processes that span the entire planet. Ecologists study many diverse and complex relations among species, such as predation and pollination. The diversity of life is organized into different habitats, from terrestrial (middle) to aquatic ecosystems.

A new study finds that the choice to eat or omit a meal before an early workout could affect our relationship to food for the rest of the day.

Well - The New York Times

Introduction. The year 2003 marked the 50th anniversary of the historic characterization of DNA by James Watson and Francis Crick with an article in the journal Nature on April 25, 1953, that revealed the structure of DNA (Watson and Crick, 1953). Their discovery was the culmination of a decade of intense research following Oswald T. Avery, Colin MacLeod, and Maclyn McCarty's demonstration that ...

1. Introduction. Alzheimer's disease (AD) is the most common cause of dementia, and with a new case occurring every seven seconds globally, the disease itself is becoming a slow pandemic (Ferri et al., 2005). One person for every 85 individuals can be expected to suffer from AD by the year 2050 (Brookmeyer et al., 2007). AD also imposes tremendous emotional and financial burden to the patient's ...
