The history of hydraulic systems can be traced back to the 1646, when Braise Pascal performed the first hydrostatic experiment. He used a Pascal's barrel to investigate the effect of a force applied at one point of the fluid and how it is transmitted to the other sections within an enclosed system. The outcome of his experiments resulted in a scientific law/principle called Pascal Law or ...

Description. The Sweeney, Robertson, and Tocher (SRT) division algorithm is used on the affected Pentium chips. It is implemented as a programmable logic array with 2,048 cells, of which 1,066 cells should have been populated with one of five values: -2, -1, 0, +1, +2. On the buggy chips, five cells that should have contained the value +2 were missing, instead returning 0.
