Diabetes is a disease caused by glucose homeostasis not functioning properly. There are two forms: Type I: this is insulin-dependent diabetes in which there's a large deficiency of insulin due to the β -cells being killed off, by a virus for example. It's also known as early-onset diabetes and usually appears during childhood.; Type II: this is non insulin-dependent diabetes in which ...

Homeostasis - Diabetes Mellitus

DNA is a long polymer made from repeating units called nucleotides. The structure of DNA is dynamic along its length, being capable of coiling into tight loops and other shapes. In all species it is composed of two helical chains, bound to each other by hydrogen bonds. Both chains are coiled around the same axis, and have the same pitch of 34 angstroms (Å) (3.4 nanometres).

DNA - Wikipedia

The expression "hands-on, minds-on" summarizes the philosophy we have incorporated in these activities - namely, that students will learn best if they are actively engaged and if their activities are closely linked to understanding important biological concepts. Many of our activities are explicitly aligned with the Next Generation Science Standards, as indicated by (NGSS) in the descriptions ...
