1. Introduction. Air quality in the built environment continues to be a primary health concern as the majority (i.e., 54% in 2014) of the world's population currently lives in urban areas, and this is projected to rise to 66% by 2050 (United Nations, 2014). Traffic emissions are the main source of air pollution in cities around the globe (Kumar et al., 2016, Kumar et al., 2015, Kumar et al., 2013).

Environmentalists have long denounced plastic as a long-lasting pollutant that does not fully break down, in other terms, not biodegradable. In 2004, a study lead by Dr Richard Thompson at the University of Plymouth, UK, reported finding great amount of plastic particles on beaches and waters in Europe, the Americas, Australia, Africa and Antarctica.

Last chance for Animals is a national, non-profit organization dedicated to eliminating animal exploitation through education, investigations, legislation, and media attention. The organization believes that animals are highly sentient creatures who exist for their own reasons independent of their service to humans; they should thus not be made to suffer for the latter.
