The two envelopes problem, also known as the exchange paradox, is a brain teaser, puzzle, or paradox in logic, probability, and recreational mathematics. It is of special interest in decision theory, and for the Bayesian interpretation of probability theory. Historically, it arose as a variant of the necktie paradox. The problem typically is introduced by formulating a hypothetical challenge of ...

Insane Troll Logic is the kind of logic that just can't be argued with because it's so demented, so lost in its own insanity, that any attempts to make it rational would make it more incomprehensible. It is logic failure that crosses over into parody or Poe's Law. A character thinks in such a blatantly illogical manner that it has to be deliberate on the part of the writer.

Various approaches have been employed over many years to distinguish human users of web sites from robots. While the traditional CAPTCHA approach of asking the user to identify obscured text in an image remains common, other approaches have also emerged. These approaches commonly require users to perform a task believed to be relatively easy for humans but difficult for robots.
