Teletype (the common (brand) name for a teleprinter) machines use what's called permutation coding of the characters. This means that unlike the stock ticker machine where you just rotate the type wheel one character for each pulse on the line the Teletype receiving machine needs to remember the order of the signals that make up one character.

In computer science, artificial intelligence (AI), sometimes called machine intelligence, is intelligence demonstrated by machines, in contrast to the natural intelligence displayed by humans and animals. Colloquially, the term "artificial intelligence" is used to describe machines that mimic "cognitive" functions that humans associate with other human minds, such as "learning" and "problem ...

The history of slavery spans many cultures, nationalities, and religions from ancient times to the present day. However the social, economic, and legal positions of slaves have differed vastly in different systems of slavery in different times and places. Slavery occurs relatively rarely among hunter-gatherer populations because it develops under conditions of social stratification.

Stardog extends SPARQL for path queries which can be used to find paths between two nodes in a graph. Path queries are similar to SPARQL property paths that recursively traverse a graph and find two nodes connected via a complex path of edges. But SPARQL property paths only return the start and end nodes of a path.
