No idea; please restate the question. What are the arrays for the number 24?

What are the arrays for the number 24 - answers.com

so basically what they are trying to show is that these squares can overlap (well actually they weren't showing this, but regardless). If they didn't then that's when the number 16 with the 2x2 squares would come into play, but if you look for all the squares whether they overlap or not there is 204P.S the 7x7 squares completely overlap each other yet within the whole chessboard there is still ...
