Positivism is a philosophical theory stating that certain ("positive") knowledge is based on natural phenomena and their properties and relations. Thus, information derived from sensory experience, interpreted through reason and logic, forms the exclusive source of all certain knowledge. Positivism holds that valid knowledge (certitude or truth) is found only in this a posteriori knowledge.

Positivism - Wikipedia

Control theory in control systems engineering is a subfield of mathematics that deals with the control of continuously operating dynamical systems in engineered processes and machines. The objective is to develop a control model for controlling such systems using a control action in an optimum manner without delay or overshoot and ensuring control stability.

Content analysis: Using the nomination reports, we conducted content analysis (Bauer & Gaskell, 2000) to investigate program risk management. In particular, we performed content coding to extract the information from each report. Based on the coding, we were able to group the information regarding program risk management into several topics.
