Maths Problems, Questions and Online Self Tests. Free online maths problems, questions and self tests on precalculus topics. Answers and detailed solutions are provided.

Maths Problems, Questions and Online Self Tests

The constant e is base of the natural logarithm. e is sometimes known as Napier's constant, although its symbol (e) honors Euler. e is the unique number with the property that the area of the region bounded by the hyperbola $y=1/x$, the x -axis, and the vertical lines $x=1$ and $x=e$ is 1. In other words, $\int_1^e \frac{1}{x} dx = \ln e = 1$. (1) With the possible exception of π , e is the most important constant in ...

e -- from Wolfram MathWorld

We now seek to give meaning to other types of exponents. The basic principle we use throughout is to choose a meaning that is consistent with the index laws above.. The Zero Index. Clearly $a^0 = 1$. On the other hand, applying index law 2, ignoring the condition $m > n$, we have $a^0 = a^{m-m} = \frac{a^m}{a^m} = 1$. If the index laws are to be applied in this situation, then we need to define a^0 to be 1.

Over the years, a variety of floating-point representations have been used in computers. In 1985, the IEEE 754 Standard for Floating-Point Arithmetic was established, and since the 1990s, the most commonly encountered representations are those defined by the IEEE.. The speed of floating-point operations, commonly measured in terms of FLOPS, is an important characteristic of a computer system ...
