The 3×3 magic square has been a part of rituals in India since ancient times, and still is today. For instance, the Kubera-Kolam, a magic square of order three, is commonly painted on floors in India. It is essentially the same as the Lo Shu Square, but with 19 added to each number, giving a magic constant of 72.

**Magic square - Wikipedia**

Dürer's magic square is a magic square with magic constant 34 used in an engraving entitled *Melancholia I* by Albrecht Dürer (The British Museum, Burton 1989, Gellert et al. 1989). The engraving shows a disorganized jumble of scientific equipment lying unused while an intellectual sits absorbed in thought. Dürer's magic square is located in the upper right-hand corner of the engraving.

**Dürer's Magic Square -- from Wolfram MathWorld**

A square which is magic under multiplication instead of addition (the operation used to define a conventional magic square) is called a multiplication magic square. Unlike (normal) magic squares, the  $n^2$  entries for an  $n$ th order multiplicative magic square are not required to be consecutive. The above multiplication magic square has a multiplicative magic constant of 4096 and was found by ...

**Multiplication Magic Square -- from Wolfram MathWorld**

Introduction. Any normal magic square may be transformed into another magic square by subtracting each number in turn from  $n^2 + 1$ . This process is referred to as complementing the magic square.
