Darwin and Natural Selection. Most educated people in Europe and the Americas during the 19th century had their first full exposure to the concept of evolution through the writings of Charles Darwin. Clearly, he did not invent the idea. That happened long before he was born. However, he carried out the necessary research to conclusively document that evolution has occurred and then made the ...

Early Theories of Evolution: Darwin and Natural Selection

History of the phrase. Herbert Spencer first used the phrase – after reading Charles Darwin's *On the Origin of Species* – in his *Principles of Biology* of 1864 in which he drew parallels between his economic theories and Darwin's biological, evolutionary ones, writing, "This survival of the fittest, which I have here sought to express in mechanical terms, is that which Mr. Darwin has called ...

Survival of the fittest - Wikipedia

Natural selection is the differential survival and reproduction of individuals due to differences in phenotype. It is a key mechanism of evolution, the change in the heritable traits characteristic of a population over generations. Charles Darwin popularised the term "natural selection", contrasting it with artificial selection, which in his view is intentional, whereas natural selection is not.

Any animal whose genital evolutionary pattern resembles a Cold War arms race deserves some attention from the scientific community. The complexity of male and female ducks' reproductive organs indicates just this. Their reproductive organs have co-evolved in a “sexual arms-race” resulting in large corkscrew phalluses and complicated vaginal tracts.
