Deterministic modeling process is presented in the context of linear programs (LP). LP models are easy to solve computationally and have a wide range of applications in diverse fields. This site provides solution algorithms and the needed sensitivity analysis since the solution to a practical problem is not complete with the mere determination of the optimal solution.

Back in the 20th century, I was taught how to teach mathematics pretty much the same way I had learned it. My fellow preservice teachers and I were told to prepare our lessons thoroughly, present the intended concept or procedure clearly (and with enthusiasm!), and guide students as they worked through some examples.
