Mitochondria - Turning on the Powerhouse Mitochondria are known as the powerhouses of the cell. They are organelles that act like a digestive system which takes in nutrients, breaks them down, and creates energy rich molecules for the cell. The biochemical processes of the cell are known as cellular respiration. Many of the reactions involved in cellular respiration happen in the mitochondria.

Rated 5 out of 5 by KWB777 from 10.5 iPad Pro is Excellent I bought the 10.5 iPad Pro to replace a 12 Microsoft Surface Pro 4. Don't get me wrong the Pro 4 is an excellent machine. I bought it at a killer price to try something different than the Apple environment I had been working in the past six years.

By the end of elementary school, students should know that by breathing, people take in the oxygen they need to live. This basic knowledge allows middle-school students to develop a more sophisticated understanding of how respiration works in terms of basic macroscopic (e.g., major organs involved) and microscopic (e.g., cellular) processes involved with breathing.
