Ecological Pyramids — Department of Ecosystem Science and ...

Ecological Pyramid Definition An ecological pyramid is a graphical representation of the relationship between different organisms in an ecosystem. Each of the bars that make up the pyramid represents a different trophic level, and their order, which is based on who eats whom, represents the flow of energy.

Ecological Pyramid - Definition, Types and Examples ...

Ecological pyramid also shows the flow of energy or biomass at each trophic level in a particular ecosystem. Biomass pertains to the amount of living or organic matter in an organism. Biomass pyramids are shaped that way to show that biomass is largest at the base, and decreasing in amount as it goes through the apex.

Ecological pyramid - Biology-Online Dictionary | Biology ...

An ecological pyramid shows the relative sizes of different components at the various trophic levels of a food chain. A trophic level refers to each stage (shown as a horizontal bar on ecological pyramids). There are three types of ecological pyramid we use: numbers, biomass and energy.

Biology: Ecological pyramids - TES Resources

Number pyramids are ecological pyramids that show the actual number of organisms in the environment. Usually there are the most producers, since they supply energy for the rest of the pyramid. As we move up in trophic level, the number of organisms usually decreases. This is because less energy is available to the next level from the previous.
