With a single facility and single information system, many physical flows can be combined into common flows regardless of channel. With common flows there is now greater movement to justify higher levels of automation, which in turn can dramatically reduce labor costs; this is particularly important for the very labor intensive e-commerce distribution channel.

Multi-Channel Distribution in the Apparel Industry ...

Capitalism is an economic system based on the private ownership of the means of production and their operation for profit. Characteristics central to capitalism include private property, capital accumulation, wage labor, voluntary exchange, a price system, and competitive markets. In a capitalist market economy, decision-making and investment are determined by every owner of wealth, property ...

A robot is a machine—especially one programmable by a computer— capable of carrying out a complex series of actions automatically. Robots can be guided by an external control device or the control may be embedded within. Robots may be constructed on the lines of human form, but most robots are machines designed to perform a task with no regard to how they look.
