AP Biology: Help and Review Course - Study.com

Credits: 1. Prerequisite: Middle school biology and chemistry. Recommended: 9th or 10th Test Prep: CLEP Biology This course covers the basic material for this exam, but this is considered a very hard test, and I would suspect more will need to be studied to learn everything required for this huge exam. It's worth the same as two college courses which is why it covers so much.

The Selfish Gene is a 1976 book on evolution by Richard Dawkins, in which the author builds upon the principal theory of George C. Williams's Adaptation and Natural Selection (1966). Dawkins uses the term "selfish gene" as a way of expressing the gene-centred view of evolution (as opposed to the views focused on the organism and the group), popularising ideas developed during the 1960s by W. D ...

The horse (*Equus ferus caballus*) is one of two extant subspecies of *Equus ferus*. It is an odd-toed ungulate mammal belonging to the taxonomic family Equidae. The horse has evolved over the past 45 to 55 million years from a small multi-toed creature, *Eohippus*, into the large, single-toed animal of today. Humans began domesticating horses around 4000 BC, and their domestication is believed to have ...

According to the documentary short Evolution vs. God, Darwinism is a leap of faith that falls far short of Creationism in explaining the mysteries of our existence. The film, which could have presented a fascinating open debate on a crucial subject, quickly devolves into a shallow-minded "gotcha" exercise.. Throughout the course of the film, we're given flashes of rapidly edited interview ...

iStockphoto. The origin of languages poses a major problem for evolutionists, and in the wake of Darwin's *The Origin of Species*, published 1859, speculation became rife—and ridiculous—as to this matter. So outlandish were these speculations that the Société de Linguistique de Paris placed a ban on all discussion of the subject, which prevailed for more than a century. 1 However, the ...

The classical Latin alphabet consisted of 23 letters, 21 of which were derived from the Etruscan alphabet. In medieval times the letter I was differentiated into I and J and V into U, V, and W, producing an alphabet equivalent to that of modern English with 26 letters. Some European languages currently using the Latin alphabet do not use the letters K and W, and some add extra letters (usually ...
