The liquid-liquid critical point of a solution, which occurs at the critical solution temperature, occurs at the limit of the two-phase region of the phase diagram. In other words, it is the point at which an infinitesimal change in some thermodynamic variable (such as temperature or pressure) will lead to separation of the mixture into two distinct liquid phases, as shown in the polymer ...

A thermodynamic cycle consists of a linked sequence of thermodynamic processes that involve transfer of heat and work into and out of the system, while varying pressure, temperature, and other state variables within the system, and that eventually returns the system to its initial state. In the process of passing through a cycle, the working fluid (system) may convert heat from a warm source ...

La vitesse du son ou célérité du son est la vitesse de propagation des ondes sonores. L'étude de la propagation du son dans l'air s'est étendue à d'autres milieux, gazeux, liquides ou solides. On parle de vitesse du son dans toute sorte de matériaux où nulle oreille ne peut l'entendre, dès lors qu'une vibration s'y transmet.
