A robot is a machine—especially one programmable by a computer— capable of carrying out a complex series of actions automatically. Robots can be guided by an external control device or the control may be embedded within. Robots may be constructed on the lines of human form, but most robots are machines designed to perform a task with no regard to how they look.

Education reform is the name given to the goal of changing public education. Historically, reforms have taken different forms because the motivations of reformers have differed. However, since the 1980s, education reform has been focused on changing the existing system from one focused on inputs to one focused on outputs (i.e., student achievement).

### **Education reform - Wikipedia**

The Functions of Education Functional theory stresses the functions that education serves in fulfilling a society ' s various needs. Perhaps the most important function of education is socialization . If children need to learn the norms, values, and skills they need to function in society, then education is a primary vehicle for such learning.
