Metric Units of Measurement. In the metric system of measurement, designations of multiples and subdivision of any unit may be arrived at by combining with the name of the unit the prefixes deka, hecto, and kilo meaning, respectively, 10, 100, and 1000, and deci, centi, and milli, meaning, respectively, one-tenth, one-hundredth, and one-thousandth. In some of the following metric tables, some ...

The metric system is an internationally recognised decimalised system of measurement. It is in widespread use, and where it is adopted, it is the only or most common system of weights and measures (see metrication). It is now known as the International System of Units (SI). It is used to measure everyday things such as the mass of a sack of flour, the height of a person, the speed of a car, and ...

The history of the metric system began in the Age of Enlightenment with simple notions of length and weight taken from natural ones, and decimal multiples and fractions of them. The system was so useful it became the standard of France and Europe in half a century. Other dimensions with unity ratios were added, and it went on to be adopted by the world.. The first practical realisation of the ...

The use of metric prefixes dates back to the inception of the French metric system, in 1793. It was originally decided that the submultiples of all basic units would be prefixed with a Latin root, corresponding to the decimal divisor (deci for 10, centi for 100, milli for 1000), whereas the decimal multiples would be prefixed with a Greek root, corresponding to the decimal multiplier (deca for ...

Metric prefixes are easy to understand and very handy for metric conversions. You don't have to know the nature of a unit to convert, for example, from kilo-unit to mega-unit. All metric prefixes are powers of 10. The most commonly used prefixes are highlighted in the table.

The rapid scale up of the response has been accompanied by an increasing emphasis on measurable indicators and results. These include programme monitoring data, behavioural and biological trends data and evaluation of programmes. The increasing demands on country monitoring and evaluation systems can only be met if better systems are built and supported.

1. Introduction. The increasing significance of shale gas plays has led to the need for deeper understanding of shale behaviour. Shale gas has been produced for many years in the U.S.A. and forms around 8% of total natural gas production (Warlick, 2006). Gas shales in the USA are predicted to become the source of 45% of all gas production by 2035, especially considering that other fossil ...
