SOL Released Tests Archived Released Tests. The following released tests are based on previous versions of the Standards of Learning (SOL) that are no longer being used in the Virginia public schools except in situations where students may still be taking previous grade 8 or End of Course SOL tests to meet graduation requirements associated with prior coursework.

VDOE :: Standards of Learning :: Archived Released Tests

Sampling and analysis or visual examination of soil to assess its status and use potential is widely practiced from plot to national scales. However, the choice of relevant soil attributes and interpretation of measurements are not straightforward, because of the complexity and site-specificity of soils, legacy effects of previous land use, and trade-offs between ecosystem services.

1. Introduction. Biochar is the product of thermal degradation of organic materials in the absence of air (pyrolysis), and is distinguished from charcoal by its use as a soil amendment (Lehmann and Joseph, 2009). Biochar has been described as a possible means to improve soil fertility as well as other ecosystem services and sequester carbon (C) to mitigate climate change (Lehmann et al., 2006 ...
