Chemistry is the natural science involved with elements and compounds composed of atoms, molecules and ions: their composition, structure, properties, behavior and the changes they undergo during a reaction with other substances.. In the scope of its subject, chemistry occupies an intermediate position between physics and biology. It is sometimes called the central science because it provides ...

According to Oxford Dictionaries Online the verb congratulate collocates with both prepositions, but the meaning is slightly different.. When you congratulate someone on something you give them your good wishes because something special or pleasant has happened to them, e.g. "I'd like to congratulate you on your marriage". When you congratulate someone for something you praise them for an ...

The following is a list of people who are considered a "father" or "mother" (or "founding father" or "founding mother") of a scientific field. Such people are generally regarded to have made the first significant contributions to and/or delineation of that field; they may also be seen as "a" rather than "the" father or mother of the field. Debate over who merits the title can be perennial.
