Managerial economics deals with the application of the economic concepts, theories, tools, and methodologies to solve practical problems in a business . In other words we can say that managerial economics is the combination of economics theory and managerial theory. It helps the manager in decision making and acts as a link between practice and theory".

Systems theory. Modern management is characterized by two approaches, the systems and the contingency approach. The systems approach views the organization as a total system comprised of interacting subsystems, all of which are in complex interaction with the relevant external environment (Lerman & Turner, 1992).
