Chapter 34 - Psychosocial and Organizational Factors

The behaviors and traits of today's children, along with their genetics, are determinants of their growth and development; their physical, mental, and psychosocial health; and their physical, cognitive, and academic performance. Technological advances of modern society have contributed to a sedentary lifestyle that has changed the phenotype of children from that of 20 years ago.

Gender is the range of characteristics pertaining to, and differentiating between, masculinity and femininity. Depending on the context, these characteristics may include biological sex (i.e., the state of being male, female, or an intersex variation), sex-based social structures (i.e., gender roles), or gender identity. Many if not most societies use a gender binary, having two genders, men ...

Myopathology – muscle spasm, muscle weakness/ atrophy involving: . There are parallel changes in the organ depots, of course. However, this is dealt with broadly under component #5.

Myopathology is listed as a separate major component of the vertebral subluxation complex simply because myopathology is more readily testable and recognizable at the office level than are organ depot changes.

Most people are under the impression that books and school projects are the only way to boost brain development. While they are also crucial in boosting one's brain capacity, there is a simpler solution probably lying idly in their backyard. Trampolines are usually viewed as big toys which both parents and children can jump on but did you know that trampoline jumping has brain-boosting effects?
