Some may point to the fact that the majority of Earth is covered with water and not understand why we need to conserve water. However, the water of the ocean does not provide fresh water, and while it's possible to make ocean water drinkable, the process is energy intensive, expensive and creates an issue with the use of chemicals and waste disposal.

NASA / JPL. The Pale Blue Dot of Earth This image of Earth is one of 60 frames taken by the Voyager 1 spacecraft on February 14, 1990 from a distance of more than 6 billion kilometers (4 billion miles) and about 32 degrees above the ecliptic plane.

### **A Pale Blue Dot | The Planetary Society**

Earth is the third planet from the Sun, and the only astronomical object known to harbor life. According to radiometric dating and other sources of evidence, Earth formed over 4.5 billion years ago. Earth's gravity interacts with other objects in space, especially the Sun and the Moon, Earth's only natural satellite. Earth orbits around the Sun in 365.26 days, a period known as an Earth year.
