Environmental ethics is the discipline in philosophy that studies the moral relationship of human beings to, and also the value and moral status of, the environment and its non-human contents.

Environmental Ethics (Stanford Encyclopedia of Philosophy)

Urbanization occurs either organically or planned as a result of individual, collective and state action. Living in a city can be culturally and economically beneficial since it can provide greater opportunities for access to the labor market, better education, housing and safety conditions, and reduce the time and expense of commuting and transportation.

Urbanization - Wikipedia

It focuses on the dynamic human-plant interrelations and impacts, the role of plants in the formation and maintenance of the existential basis, social relations, cultural values and symbols, and vice versa the role of man, their cultural and economic orientations and transformation practices in the plant world. The idea for this conference grew out of the research work of a team
