The connection between race and intelligence has been a subject of debate in both popular science and academic research since the inception of IQ testing in the early 20th century. There remains some debate as to whether and to what extent differences in intelligence test scores reflect environmental factors as opposed to genetic ones, as well as to the definitions of what "race" and ...

Self-esteem is an individual's subjective evaluation of their own worth. Self-esteem encompasses beliefs about oneself (for example, "I am competent", "I am worthy") as well as emotional states, such as triumph, despair, pride, and shame. Smith and Mackie (2007) defined it by saying "The self-concept is what we think about the self; self-esteem, is the positive or negative evaluations of the ...

Sampling and analysis or visual examination of soil to assess its status and use potential is widely practiced from plot to national scales. However, the choice of relevant soil attributes and interpretation of measurements are not straightforward, because of the complexity and site-specificity of soils, legacy effects of previous land use, and trade-offs between ecosystem services.

How often have you heard the quote in one form or another? "Democracy is the worst form of Government," said Winston Churchill in 1947, "except for all those other forms that have been tried from time to time...." The sentiment expresses two cultural values many Americans are trained to hold uncritically: the primacy of democracy and the burdensomeness of government as a necessary evil.

Why Socrates Hated Democracies: An Animated Case for Why ...

A cognitive bias is a mistake in reasoning, evaluating, remembering, or other cognitive process, often occurring as a result of holding onto one's preferences and beliefs regardless of contrary information.
