16. (2003-48) The above chart shows vertebrate embryo development. Which of these would be least related to the others? a. 1 b. 2 c. 3 d.

c. 25%

Synesthesia is a perceptual phenomenon in which stimulation of one sensory or cognitive pathway leads to automatic, involuntary experiences in a second sensory or cognitive pathway. People who report a lifelong history of such experiences are known as synesthetes.. The term is from the Ancient Greek σύν syn, "together", and αἴσθησις aisthēsis, "sensation".

Synesthesia - Wikipedia

When it comes to stem cells—especially stem cell therapy—there are a few waves of shock our patients and readers usually go through. The first big revelation comes when you realise that stem cells aren't some magical new invention—it's a natural building block of our bodies. In a very rough generalization, each and every one of us was once just a handful of stem cells.
