Earth is the third planet from the Sun, and the only astronomical object known to harbor life. According to radiometric dating and other sources of evidence, Earth formed over 4.5 billion years ago. Earth's gravity interacts with other objects in space, especially the Sun and the Moon, Earth's only natural satellite. Earth orbits around the Sun in 365.26 days, a period known as an Earth year.

Population genetics (ecology) In population genetics a sex population is a set of organisms in which any pair of members can breed together. This means that they can regularly exchange gametes to produce normally-fertile offspring, and such a breeding group is also known therefore as a Gamete deme. This also implies that all members belong to the same species.

Admittedly a prosaic concept, research impact can be roughly divided into academic and non-academic dimensions. Academic research impact is often (over)simplified to mere citations—an impactful article is well cited and utilized by others, with citation counts being offered by Google Scholar, Scopus, or ISI Web of Science.
