This is a multiple choice test. I made this to help everyone in my anatomy class to score better on their next test. I hope this helps :) Try not to look at your notes while taking this quiz. It could help without looking. - Ann Marie

Chapter 13 Anatomy Quiz - ProProfs Quiz

The brain and the spinal cord are the central nervous system, and they represent the main organs of the nervous system. The spinal cord is a single structure, whereas the adult brain is described in terms of four major regions: the cerebrum, the diencephalon, the brain stem, and the cerebellum.

13.2 The Central Nervous System - Anatomy and Physiology

Dura Mater (outer, tough), Arachnoid Mater (Middle, contains CSF), Pia Mater (inner, delicate and thin, filled with blood vessels that supply nutrients to the cord)

Anatomy And Physiology Chapter 13--The Spinal Cord Flashcards

There is a physiological concept known as localization of function that states that certain structures

are specifically responsible for prescribed functions. It is an underlying concept in all of anatomy and physiology, but the nervous system illustrates the concept very well.
