Cancer growth is a multistage, stochastic evolutionary process. To measure the divergent outcomes of tumors, we teamed up with the Winslow Lab to develop a new method that measures the growth of thousands of tumors within a single mouse using DNA barcodes, termed Tuba-seq. Tuba-seq measures tumor sizes far more precisely and rapidly than previous approaches, and demonstrates the importance of ...

Description. PIC microcontrollers are equipped with one or more precision timing systems known as Timers. They can be used to perform a variety of time precision functions, such as generating events at specific times, measuring the duration of an event, keeping date and time record, counting events, etc.

Lab 7: PIC Timers and Counters (Part 1) - Embedded Lab

A lab-on-a-chip (LOC) is a device that integrates one or several laboratory functions on a single integrated circuit (commonly called a "chip") of only millimeters to a few square centimeters to achieve automation and high-throughput screening. LOCs can handle extremely small fluid volumes down to less than pico-liters. Lab-on-a-chip devices are a subset of microelectromechanical systems (MEMS ...

Lab-on-a-chip - Wikipedia

The Non-Human Primate Reference Transcriptome (NHPRT) Project and Cross-Primate Genomics. Our lab leads the computational analysis of the NHPRT Project, where we are working to perfect the de novo assembly of transcriptomes for various human tissues and primates to compare tissue-specific and species-specific differences.

1000 North Oak Avenue Marshfield, WI 54449-5795 Bacterial Identification by 16S rRNA Gene Sequence Analysis Background All bacteria contain 16S ribosomal RNA (rRNA) genes of approximately 1500 base pairs (bp) in length. rRNA genes

Bacterial Identification by 16S rRNA Gene Sequence Analysis

a_n is the n th term of the sequence. When writing the general expression for an arithmetic

sequence, you will not actually find a value for this. It will be part of your formula much in the same way x's and y's are part of algebraic equations. a 1 is the first term in the sequence. To find the explicit formula, you will need to be given (or use computations to find out) the first term and ...

Arithmetic Sequences - AlgebraLAB

In bioinformatics, sequence clustering algorithms attempt to group biological sequences that are somehow related. The sequences can be either of genomic, "transcriptomic" or protein origin. For proteins, homologous sequences are typically grouped into families. For EST data, clustering is important to group sequences originating from the same gene before the ESTs are assembled to reconstruct ...

In this manual all commands are given in code boxes, where the R code is printed in black, the comment text in blue and the output generated by R in green. All comments/explanations start with the standard comment sign ' # ' to prevent them from being interpreted by R as commands. This way the content in the code boxes can be pasted with their comment text into the R console to evaluate their ...
