Biology Junction Answer Keys

In your case, if there is a one-to-one or a one-to-zero-or-one relationship between User and Employee, then yes, the User_ID in the Employee table can be Foreign Key (FK) and Primary Key (PK) at the same time. In words, this would mean: A user can be an employee as well, in which case the employee data would be attached to the user.

Can a database attribute be primary and foreign key ...

I am assuming you are referring to the machine keys in the machine.config file, in that case it depends on what version of the .NET framework you want, it should be in the default location, for example .NET 4.0:

There are only two hard things in Computer Science: cache invalidation and naming things-- Phil Karlton Coming up with a good name for a table that represents a many-to-many relationship makes the relationship easier to read and understand. Sometimes finding a great name is not trivial but usually it is worth to spend some time thinking about.

What should I name a table that maps two tables together?
