Introduction. Physical activity has been shown to benefit several metabolic disorders, including obesity, diabetes, and fatty liver disease (Kirwan et al., 2017). Older cross-sectional studies suggested that exercise might prevent age-related bone loss (Krolner et al., 1983, Prince et al., 1991). Loss of bone mass with age has significant socio-economic and medical implications because of the ...

C57BL/6J is the most widely used inbred strain and the first to have its genome sequenced. Although this strain is refractory to many tumors, it is a permissive background for maximal expression of most mutations. C57BL/6J mice are resistant to audiogenic seizures, have a relatively low bone density, and develop age related hearing loss. They are also susceptible to diet-induced obesity, type ...

Bone grafts for spinal fusion In surgery of the spine, especially spinal fusion , (also called arthrodesis), surgeons may decide to use bone grafts to assist in the healing and remodeling of the spine after surgery. Normally, small pieces of bone are placed into the space between the vertebrae to be fused, and sometimes larger solid pieces of bone provide immediate structural support.
