An example using a macro can be found here: Macro to colour part of the text in cells in Excel. Excel Macros - For Loop to Colour Part of Cells. Use an Excel macro that contains a for loop to loop through rows of weather data and colour part of the cell text red if it contains the word hot and blue if it contains the word cool:

Coloring partial text within cell in Excel - Super User

You can also do this from the other direction, changing the DataGridViewTextBoxCell to a DataGridViewLinkCell I suggest this second since you will need to apply any changes that apply to all links to every cell.. This does have the advantage though that you will not then need to hide the autogenerated column, so may suit you best.
