Modal logic is a type of formal logic primarily developed in the 1960s that extends classical propositional and predicate logic to include operators expressing modality. A modal—a word that expresses a modality—qualifies a statement. For example, the statement "John is happy" might be qualified by saying that John is usually happy, in which case the term "usually" is functioning as a modal.

Ten Keys to Successful Parenting. Parenting is an important job and it's key that we discipline in a way that teaches responsibility by motivating our children internally, to build their self-esteem and make them feel loved. If our children are disciplined in this respect, they will not have a need to turn to gangs, drugs, or sex to feel powerful or belong.
