aimed to both build an ability at, and help students experience the pleasure of, doing mathematics. Applications, and Computers. The point of view taken here, that linear algebra is about vector spaces and linear maps, is not taken to the exclusion of all others. Applications and the role of the computer are interesting, important,

student that linear algebra is a cohesive subject and not simply a collection of isolated definitions and techniques. One way in which we do this is by using a crescendo of Equivalent Statements theorems that continually revisit relationships among systems of equations, matrices, determinants, vectors, linear transformations, and eigenvalues.
