This lab uses the glenco simulator, Virtual Lab: Population Biology to collect data on two populations of paramecium, P. caudatum and P. aurelia.. Though the simulator doesn't expressly say it, the activity illustrates the competitive exclusion principle by showing students how each population behaves when grown alone or when mixed together.

Credits: 1. Prerequisite: Middle school biology and chemistry. Recommended: 9th or 10th Test Prep: CLEP Biology This course covers the basic material for this exam, but this is considered a very hard test, and I would suspect more will need to be studied to learn everything required for this huge exam. It's worth the same as two college courses which is why it covers so much.

Why a Scientific Format? The scientific format may seem confusing for the beginning science writer due to its rigid structure which is so different from writing in the humanities. One reason for using this format is that it is a means of efficiently communicating scientific findings to the broad community of scientists in a uniform manner.

### **How to Write Guide: Sections of the Paper - Bates College**

Phylogenetic trees are diagrams of evolutionary relationships among organisms. Scientists can estimate these relationships by studying the organisms' DNA sequences. As the organisms evolve and diverge, their DNA sequences accumulate mutations. Scientists compare these mutations using sequence ...
