The liver is shaped like a half-moon and is your body's largest solid organ. It's tilted in the body's cavity, with the left portion above the stomach and the right portion above the small intestine.

Liver: Anatomy, Definition, Symptoms, and More

Aerodynamics, from Greek *ἀήρ* aer (air) + *δυναμική* (dynamics), is the study of motion of air, particularly as interaction with a solid object, such as an airplane wing. It is a sub-field of fluid dynamics and gas dynamics, and many aspects of aerodynamics theory are common to these fields. The term aerodynamics is often used synonymously with gas dynamics, the difference being that ...

Reporting by Bonnie Berkowitz; Graphic by Patterson Clark Don't just sit there! We know sitting too much is bad, and most of us intuitively feel a little guilty a~er a long TV binge.

Don't just sit there! - The Washington Post

Bloodletting (or blood-letting) is the withdrawal of blood from a patient to prevent or cure illness and disease. Bloodletting, whether by a physician or by leeches, was based on an ancient system of medicine in which blood and other bodily fluids were regarded as "humours" that had to remain in proper balance to maintain health. It is claimed to have been the most common medical practice ...
