Magnets and Magnetism Worksheets. There is an invisible force field around the Earth-the Earth's magnetic field. Earth is a giant magnet, and some rocks have this property, too, called magnetism. Magnets repel and attract. How do they do that? To find out, readers will learn about tiny atomic particles called electrons.

### **Chapter 36: Magnetism Chapter Exam - Study.com**

Notes: The answers students find to this question may be philosophically unsatisfying. It is one thing to discover that magnetism is produced by moving electric charges, but quite another to discover (much less explain) just what a magnetic field is in an ontological sense. Sure, it is easy to explain what magnetic fields do, or even how they relate to other phenomenon.
