This year, I've had such lovely opportunities to move beyond my own hills and talk about math, teaching, West Virginia, public education. Last spring, The Biden Foundation reached out for a blog post from a WV teacher.. This fall, I sat at the unbelievably large NCTM table, beginning the planning process to celebrate 100 years of an organization dedicated to improving math teaching.

Intelligence To be intelligent you first have to know what being Intelligent is. And you also have to know what being ignorant is. Ignorant is just another word for "Not knowing". But not knowing is not always obvious or clearly understood. That's because learning is not fully understood. The more you learn the more you should realize what you didn't know.

Stardog extends SPARQL for path queries which can be used to find paths between two nodes in a graph. Path queries are similar to SPARQL property paths that recursively traverse a graph and find two nodes connected via a complex path of edges. But SPARQL property paths only return the start and end nodes of a path.

In mathematics, a function was originally the idealization of how a varying quantity depends on another quantity. For example, the position of a planet is a function of time. Historically, the concept was elaborated with the infinitesimal calculus at the end of the 17th century, and, until the 19th century, the functions that were considered were differentiable (that is, they had a high degree ...
