Dr. Vint Virga likes to arrive at a zoo several hours before it opens, when the sun is still in the trees and the lanes are quiet and the trash cans empty.

Zoo Animals and Their Discontents - The New York Times

In short: self as it suggests, refers to itself- the object which has called the method. That is, if you have N objects calling the method, then self.a will refer to a separate instance of the variable for each of the N objects. Imagine N copies of the variable a for each object; __init__ is what is called as a constructor in other OOP languages such as C++/Java.
