Plants make their own food using photosynthesis. This activity will teach students about the crucial role photosynthesis plays in the life of a plant.

Photosynthesis: StudyJams! Science | Scholastic.com

This worksheet was designed for freshman level biology because I found their very old textbook was not written in a way that made photosynthesis easy to understand. Students read short text passages and then color images to help them relate the textual information with the graphic.

Photosynthesis Coloring

Energy moves through the food chain from life form to life form. The first step is always photosynthesis in which the sun's radiant energy, that pours onto the earth everyday, is turned into carbohydrate molecules. These carbohydrates are used by all living things as fuel for energy, and as building blocks to build more pieces of themselves.
