Concept 1: Overview of Respiration. We can divide cellular respiration into three metabolic processes: glycolysis, the Krebs cycle, and oxidative phosphorylation. Each of these occurs in a specific region of the cell. Glycolysis occurs in the cytosol. The Krebs cycle takes place in the matrix of the mitochondria. Oxidative phosphorylation via...

### **Pearson - The Biology Place - Prentice Hall**

In this POGIL lesson, students construct their own learning about the process of cellular respiration through critical analysis of a paper model. Students will work in groups with assigned roles. The 3 major steps of cellular respiration and the primary reactants and products of each step will be elucidated.
