In common usage, the word "human" generally refers to the only extant species of the genus Homo—anatomically and behaviorally modern Homo sapiens.. In scientific terms, the meanings of "hominid" and "hominin" have changed during the recent decades with advances in the discovery and study of the fossil ancestors of modern humans. The previously clear boundary between humans and apes has ...

IS THERE ANY CERTAIN KNOWLEDGE ? This subject of life after death is one of great interest to all of us, not only because we ourselves must certainly one day die, but far more because there can scarcely be any one among us, except perhaps the very young, who has not lost (as we call it) by death someone who is near and dear to us.

Biocentrism is a new "Theory of Everything" proposed by American scientist Robert Lanza, which sees biology as the central driving science in the universe, and an understanding of the other sciences as reliant on a deeper understanding of biology. Lanza believes that life and biology are central to being, reality, and the cosmos.
