ACQUITY UPLC I-Class PLUS System The highest performing UPLC system ever engineered. With dramatically decreased dispersion for the highest resolution, rapid injection cycles and sample throughput with reduced carryover, it's clearly the superior inlet to any mass spectrometer.

Reversed-Phase Liquid Chromatography : Waters

R_f values are calculated by looking at the distance each component travels on the chromatography paper compared to the distance traveled by the solvent front. This ratio will be different for each component due to its unique chemical properties. When measuring the distance the component traveled, you should measure from the origin (where the middle of the spot originally was) and then to the ...
