Most Americans consider themselves as fairly knowledgeable about their country's history. They could probably tell you that Abe Lincoln was the 16th president or that Teddy Roosevelt was a proud "Trust Buster" or, at the very, very least, that we've been around since 1776 (and formally so since 1789). But when you peek beyond the purview of history textbooks, it turns out there's a ...

Life is a characteristic that distinguishes physical entities that have biological processes, such as signaling and self-sustaining processes, from those that do not, either because such functions have ceased (they have died), or because they never had such functions and are classified as inanimate. Various forms of life exist, such as plants, animals, fungi, protists, archaea, and bacteria.
