Earth system science (ESS) is the application of systems science to the Earth sciences. In particular, it considers interactions between the Earth's "spheres"—atmosphere, hydrosphere, cryosphere, geosphere, pedosphere, biosphere, and, even, the magnetosphere—as well as the impact of human societies on these components. At its broadest scale, Earth system science brings together ...

The age of the earth has been a topic of debate among Christians over the last two centuries. Several Christian ministries promote the idea that the earth is less than 10,000 years old, which they say comes from the Bible. In reality, the Bible makes no claim as to the age of the earth, although it ...

Executive Summary of the Decade What happened in the world of Science Fiction and Fantasy between 1920 and 1930? It was a strange decade, with much of a literate 20-volume fantasy magnum opus by James Branch Cabell and the poetic sophistication of Edward John Moreton Drax Plunkett (Lord Dunsany) at one end of a spectrum and the anti-literary raw stories of pulp magazines at the other.

Peak oil is the point in time when the maximum rate of global petroleum production is reached, after which the rate of production enters its terminal decline. If global consumption is not mitigated before the peak, an energy crisis may develop because the availability of conventional oil will drop and prices will rise, perhaps dramatically.
