Over-categorization is placing a file, category or other page in several levels of the same branch in the category tree. The general rule is always place an image in the most specific categories, and not in the levels above those. Exceptions to this rule are explained in the section below.. Example: An image needing to be categorized shows a yellow circle.

Wikipedia offers several ways to group articles: categories, list articles (including item lists, as well as topical glossary, index, outline, and timeline articles), other lists including embedded lists, and navigation templates (of which article series boxes are one type). The grouping of articles by one method neither requires nor forbids the use of the other methods for the same ...

All first year students at the University of Technology Sydney could soon be required to take a compulsory maths course in an attempt to give them some numerical thinking skills. The new course ...

### **How to teach all students to think critically**

You missed the mark a bit there. You pointed out that, "Intelligence is not equal throughout the races. Examples of this are evident in the inventiveness of a particular group, what technologies they create, the societal structure they create, their art and their sciences", a statement which in and of itself is a contradiction.

Gee and Green (1998, p. 120) have argued that systems for analysing classroom discourse must be integrated within an ethnographic perspective to form a coherent 'logic-of-inquiry' that recognises the importance of established educational process and cultural practices in shaping the meaning of teachers' and students' contributions. Accordingly, our coding scheme employs tools derived from ...

History Unit Summary: History learning is crucial to the primary school classroom. History informs and reminds us of the past. Subsequently, history learning provides an avenue for inquiring between past and present and the relationships between. Likewise, history learning challenges personal context and meaning. During this process, students develop the ability to think critically, creatively

Anti-psychiatry is a movement based on the view that psychiatric treatment is more often damaging than helpful to patients. It considers psychiatry a coercive instrument of oppression due to an unequal power relationship between doctor and patient and a highly subjective diagnostic process. It has been active in various forms for two centuries.
