Linear equations are also called first degree equations, as the highest power of the variable in these equations is 1. E.g.  $x + 5 = 9$  is an equation of the first degree, which is often called a linear equation. Solving Equations Recall that: To solve a linear equation, we do the same operation to both sides of the equation.

The augmented matrix represents all the important information in the system of equations, since the names of the variables have been ignored, and the only connection with the variables is the location of their coefficients in the matrix. It is important to realize that the augmented matrix is just that, a matrix, and not a system of equations. In particular, the augmented matrix does not have ...
